JK Lakshmi Cement Ltd. recognises that the energy consumption and carbon emissions are the two most important issues currently affecting the planet. We comprehend the risk of dependence on fossil fuels and associated carbon emissions related to our operations. The Company is committed to design, manufacture and distribute our products & services in an energy efficient manner to become a green company.

The Company is committed to:

- Complying with all applicable legal and other requirements related to our energy & carbon regulation, consumption and efficiency.
- Raise awareness to encourage efficient use of energy resources, with a focus on reducing its energy intensity and carbon footprint of operations and products.
- Increase the use of renewable energy wherever possible.
- Evaluate technically and financially feasible and cost-effective options to reduce potential carbon emissions during the construction and operation of new projects.
- Continually improve energy and carbon management within and across the supply and value chains by adopting economically viable management systems and best practices.
- Engage with internal and external stakeholders and wider communities to understand and collaborate on actions promoting reduced energy intensity and low carbon approaches to benefit both the Business and Society at large.
