**COMPOSITE CEMENT**  
FOR EVER LASTING STRENGTH

## RAISING THE BENCHMARK

At JK Lakshmi Cement, winning everyday is a culture to achieve perfection. And it is achieved by handling the adverse conditions with intelligent solutions and incredible strength. This continuous vigour has led to the design of truly innovative cement - JK Lakshmi Composite Cement - which personifies strength in true sense. Created with the best available limestone quality, adhering to world-class quality control measures in production processes. Along with JK Lakshmi Cement's unique Mazbooti Guaranteed advantage - a promise for consistency in strength, fineness, setting time, weight and colour.

## COMPOSITE RUST RESISTANT CEMENT

Sulphates and chlorides are the biggest enemies of the structures. They cause rusting and deteriorate them over the years, resulting in reduced strength and diminished durability of structures. The composite cement with its special combination of high glass content slag and high reactive fly ash, resists sulphate and chloride attacks and thus protects the structures from the menace of rust. The result being, your dream house remains fresh as ever and durable for years.

## BEST OF ALL THE WORLDS

### RUST PROTECTION

Resistance to sulphate and chloride protects the steel bars, enhancing the strength and durability of the structure.

### SUPERIOR PARTICLES

Super fine particles lead to more volume per kg of cement with superior finish.

### ECO-FRIENDLY

A contemporary and green cement decreasing CO<sub>2</sub> emissions upto 50% during its manufacturing process, leading to more sustainable construction and cleaner air.

### PROGRESSIVE

A highly progressive cement offering better cohesiveness, superior workability and less water requirement than Ordinary Portland cement.
